RESEARCH STUDY IB

April 1958

Wisconsin : Joint Staff, Coord. Comm. 4 Hi. Ed.

FROM WHERE DO WISCONSIN STUDENTS COME WHO ATTEND THE PRIVATE COLLEGES IN WISCONSIN

Research Study I dealt with the distribution of the students attending the state colleges and the University and included maps showing the drawing power of these institutions. Research Study IA analyzed the geographic origins of students attending both public and private colleges in Wisconsin. This study follows the pattern of Research Study I and includes the drawing power of the private colleges, the distribution of private college enrollment among the counties and in relation to the population of the state. The data for this study is taken from enrollments reported for the first semester of the 1956-57 school year. The county origin of the student is determined by the location of the high school from which he graduated. Only students attending Wisconsin institutions are included.

Section I

THE SCOPE OF THE DRAWING POWER OF THE PRIVATE INSTITUTIONS

In determining the scope of the drawing power of the private institutions the percentage of a college's enrollment which comes from Wisconsin, the percentage of Wisconsin students coming from the county in which the college is located and its contiguous counties and the number of counties represented are all factors which should be taken into consideration.

The private institutions in the state may be divided by type of school into five groups: liberal arts colleges, teachers colleges, technical schools, major and minor seminaries and junior colleges. (See list of private institutions in appendix.) Each of these groups will be considered separately since each provides a different kind of educational program.

The seventeen liberal arts colleges are located with two exceptions (Northland and Viterbo) in the eastern part of the state. St. Norbert, Milton, Lakeland, Mount Mary and Cardinal Stritch are colleges which serve a predominantly local area. Each of them not only has a high percentage of its enrollment made up of Wisconsin students but each also has a large percentage of its Wisconsin students coming from the home county in which the college is located and its contiguous counties. However, both St. Norbert and Mount Mary have students coming from at least forty of the seventy-one counties in Wisconsin. (See appendix for maps of the drawing power of each college, arranged alphabetically.)

Northland, Carroll, Northwestern and Viterbo draw mainly from within the state for their enrollments but tend to attract a smaller proportion of students from their home and contiguous counties than the first group. Even so, sixty percent or more of the Wisconsin enrollment comes from home or contiguous counties of Northland, Carroll and Viterbo. Northwestern has a more extensive drawing power over the state; only one-third of its students come from Jefferson and surrounding counties. Carroll has students from forty-seven of the seventy-one counties.

Marquette, Alverno and St. Francis College have a lower percentage of enrollment from Wisconsin with a high proportion of students from their home and contiguous counties. However, sixty counties are represented in Marquette's enrollment.

Milwaukee-Downer, Holy Family, Ripon, Lawrence and Beloit attract students from a predominantly larger area than the other liberal arts colleges. They have a generally lower proportion of Wisconsin enrollment and also a lower percentage of students from their home and contiguous counties. Ripon and Lawrence had students registered from more than forty counties in Wisconsin.

The state colleges have a much larger proportion of students coming from Wisconsin (93%) than do these seventeen liberal arts colleges (61%). However, the liberal arts colleges draw a larger percentage of Wisconsin students from their home and contiguous counties (64%) than do the state colleges (56%). Only three out of the seventeen private colleges (Northwestern, Ripon and Lawrence) obtain less than fifty per cent of their enrollment from home and surrounding counties, while three of the ten state colleges do also. The state colleges draw students from an average of fifty-three counties while only thirty counties are represented on the average at the seventeen liberal

arts colleges. Thus while these private colleges have a wider drawing power outside of Wisconsin, within the state the state colleges have a larger area of drawing power. This indicates that while the private colleges serve more Wisconsin than out-of-state students they serve a more limited area of students within the state than do the state colleges.

The three private teachers colleges, Dominican, Edgewood and Marian, all maintained by the Roman Catholic Church, are also located in the southeastern part of Wisconsin. They serve a predominantly local area both in terms of the high proportion of Wisconsin students and of the percentage of Wisconsin students coming from home and contiguous counties. Marian has students from nearly twice as many counties (27) as the other two schools.

The four technical schools, three of which are situated in Milwaukee and one in Appleton, vary in their drawing power. Wisconsin Conservatory attracts all but five of its students from Milwaukee and contiguous counties. Layton School of Art has a very large proportion of its students coming from Wisconsin and almost two-thirds coming from Milwaukee and contiguous counties. On the other hand, only a little over one-third of the students at Milwaukee School of Engineering came from Wisconsin and slightly more than half of the Wisconsin students were from Milwaukee and surrounding counties. However, all but seven of the seventy-one counties were represented at this school. The Institute of Paper Chemistry has less than 15 per cent of its enrollment coming from Wisconsin and of these Outagamie and contiguous counties supplied only 11 per cent of the student body. (1 ont of 9 Wisconsin enrollees) This wider drawing power is explained by the fact that it is a graduate institution.

All of the seminaries are located in the southeastern part of the state with the exception of Holy Cross at La Crosse. St. Francis Major Seminary and Lutheran Theological Seminary have a high percentage of Wisconsin enrollment but vary in representation of counties having students from forty and seventeen counties respectively. Mission House receives only a third of its students from Wisconsin but 80% of those come from Sheboygan and surrounding counties. Immaculate Conception Seminary and Nashotah House Seminary obtain a very small proportion of their students from Wisconsin but a very high percentage of these come from Waukesha and contiguous counties.

The minor seminaries enroll a greater proportion of their students from Wisconsin. Saint Francis Minor Seminary, Salvatorian Seminary and Queen of Apostles Seminary draw a larger proportion of Wisconsin students from their home and contiguous counties than do Saint Lawrence Seminary and Holy Cross Seminary.

The three junior colleges in Milwaukee which prepare students for entrance into religious training serve for the most part a local area. Divine Savior College, Concordia College and Mater Dolorosa have 79, 66 and 55% respectively of their enrollment from Wisconsin. While Concordia has 90% of its Wisconsin students composed of Milwaukee and contiguous county residents, Divine Savior has only 54% and Mater Dolorosa 23%.

Section II

HOW IS WISCONSIN'S PRIVATE COLLEGE ENROLLMENT DISTRIBUTED AMONG THE COUNTIES?

This analysis employs the same technique which was used for the public colleges in Research Study I. The seventy-one counties of the state were arranged in descending order of population. The counties then were divided into four groups with the 18 most populous counties comprising the top quarter, the 17 next most populous counties in the second quarter, the 18 third most populous counties in the third quarter and the 18 least populous counties in the lowest quarter. The college enrollment in each county is the number of students attending college in Wisconsin who graduated from a high school in that county.

The eighteen counties in the top quarter containing 69% of Wisconsin's population account for 83% of Wisconsin undergraduate enrollment in the private colleges. These counties also contain thirty-five of the thirty-seven private colleges. The second quarter making up 16% of the population of the state contains only 9% of the private student enrollment. There is one seminary in this group of counties. The third quarter has 10% of the population of Wisconsin and 6% of the private college students. The eighteen least populous counties account for 5% of the state's population and 2% of the private college enrollment.

THE 18 MOST POPULOUS COUNTIES IN WISCONSIN CONTAIN:

- 69% of Wiscensin's Population
- 83% of Wisconsin Enrollment in Private Colleges
- 35 of the 37 Private Colleges

* undergraduate enrollment

It is evident that the private colleges receive a disproportionate amount of their students from the 18 most populous counties. This is to be expected since 35 of the 37 private institutions are located within these counties. However, the public institutions and more particularly the state colleges tend to equalize this distribution. (See Table I.) When the enrollments of the public and private institutions are added together the percentage of enrollment just happens to equal the percentage of population which each group of counties has. But the fact is that each group of counties whether of large population or small is sending students to college in proportion to its population. These percentages must be compared with the percentages of 16 to 17 year olds in each group in order to arrive at a meaningful analysis of educational opportunity. Although the first group of counties has 69% of the population and enrollment, it has 66% of 16 to 17 year olds. The other three groups of counties have a slightly larger share of 16 to 17 year olds than they do of college enrollment. Thus it can be seen that a student living in a county in group one has a slightly better chance of going to college than a student in any of the other three groups.

TABLE I

PUBLIC AND PRIVATE COLLEGE ENROLLMENTS BY GROUPS OF EQUAL NUMBERS OF COUNTIES

Groups of Counties	Percent of Wisconsin Population (1957)	Percent of 16-17 year olds (1955)	Percent of College Enrollment (1956-57)				
			Public			Private	Total Public and Private
			University	State Colleges	Total Public		
18 most populous counties	69	66	78	40	64	83	69
17 second most pop. counties	16	17	11	32	19	9	16
18 third most pop. counties	10	11	8	18	11	6	10
18 least populous counties	5	6	3	10	6	2	5
TOTAL	100	100	100	100	100	100	100

Section III

HOW IS WISCONSIN'S PRIVATE COLLEGE ENROLLMENT DISTRIBUTED IN RELATION TO THE POPULATION OF THE STATE?

This section follows the pattern in Research Study I. The total population of the state was divided into four equal parts. The seventy-one counties were arranged in descending order from the most populous to the least populous and divided into four groups with each group containing approximately one quarter of the population of the state.

The first group of counties (Milwaukee only) contains 26% of Wisconsin's population and 42% of Wisconsin private college enrollment. There are 13 private institutions located in this county. The second group of 8 counties comprising 26% of the population of the state accounts for 26% of Wisconsin students in the state's private colleges. These counties have 12 private colleges. The third group (17 counties) makes up 25% of Wisconsin's population but only 19% of the private enrollment. Ten private colleges are located in this group. The last group of 41 counties containing 23% of the state's population accounts for 13% of the private enrollment from Wisconsin. Only two private colleges are situated in these counties.

FIRST GROUP OF COUNTIES

Milwaukee

This County Contains:

- 26% of Wisconsin's Population
- 42% of Wisconsin's Private College Enrollment
- 13 Private Institutions:
  - 5 Liberal Arts
  - 3 Technical
  - 3 Junior Colleges
  - 2 Seminaries

SECOND GROUP OF COUNTIES

These Counties Contain:

- 26% of Wisconsin's Population
- 26% of Wisconsin Private College Enrollment
- 12 Private Colleges

Dane	Teachers College, Seminary
Racine	Liberal Arts, Teachers College
Waukesha	Liberal Arts, 2 Seminaries
Brown	Liberal Arts
Rock	2 Liberal Arts
Winnebago	
Kenosha	
Sheboygan	Liberal Arts, Seminary

THIRD GROUP OF COUNTIES

These Counties Contain:

- 25% of Wisconsin's Population
- 19% of Wisconsin Private College Enrollment
- 10 Private Colleges

Outagamie	Technical, Liberal Arts
Marathon	
Manitowoc	Liberal Arts, Seminary
Fond du Lac	Liberal Arts, Teachers College, Seminary
La Crosse	Liberal Arts, Seminary
Eau Claire	
Dodge	
Wood	
Jefferson	Liberal Arts
Walworth	
Douglas	
Chippewa	
Grant	
Washington	
Waupaca	
Columbia	
Sauk	

FOURTH GROUP OF COUNTIES

These Counties Contain:

- 23% of Wisconsin's Population
- 13% of Wisconsin Private College Enrollment
- 2 Private Colleges

Marinette
Portage
Barron
Shawano
Monroe
Clark
Ozaukee - Seminary
Polk

Forest
Florence

Again it is clear that the private colleges obtain a larger proportion population wise of their students from the first and second groups of counties and a smaller proportion from the last two groups of counties. There is also a concentration of institutions among the first three groups of counties although it is not as great as when the counties were divided into four groups of equal numbers as in Section II. Here, too, the public institutions and especially the state colleges equalize the distribution. (See Table II.)

The conclusion of this data is that groups of counties equal in population with an almost equal percentage of 16-17 year olds send an equal proportion of students to public and private colleges combined. Only the last group of counties has a larger percentage of 16-17 year olds than it does of college enrollment.

TABLE II

PUBLIC AND PRIVATE COLLEGE ENROLLMENTS BY GROUPS OF COUNTIES EQUAL IN POPULATION

Groups of Counties	Percent of Wisconsin Population (1957)	Percent of 16-17 year olds (1955)	Percent of College Enrollment (1956-57)				
			Public			Private	Total Public and Private
